## Project Scope:

Unilever is one of the largest producers of packaged consumer goods, worldwide. The Trumbull campus is responsible for the research and development of skin care (cleaning and moisturizing) products for both the North American and global markets, while the Englewood Cliffs campus is responsible for the research and development of food products. LAN is currently providing outsourced Environmental, Health, and Safety (EH&S) consulting services at these two R&D laboratories.

LAN was initially retained over thirteen years ago to develop a complete EH&S compliance calendar to address all of their programs at the R&D Campus in Edgewater, New Jersey. The Edgewater facility consisted of a 40+acre campus with laboratory, pilot plant, and support space, and operated with up to 500 employees. Once the calendar was in place, LAN's services were used to replace a former in-house staff of seven employees. LAN provided EH&S services to the Edgewater facility until it was relocated to Trumbull in the Spring of 2005. We currently provide a full-time employee at the Trumbull, Connecticut facility to serve as the in-house EH&S Coordinator for a 1000+ person, 25+ acre, multi-building, R&D campus. We also provide EH&S services and support on an ongoing basis at the Englewood Cliffs facility. During our tenure with Unilever, we have also had the opportunity to provide various EH&S services to the Rolling Meadows, Lisle, Bramalea, and Covington facilities.

## Services Performed:

- Regulatory Compliance Consulting
- Stormwater, Wastewater, & Air Permitting
- Waste Management
- ISRA Reporting
- Site Investigations
- Soil & Groundwater Sampling
- Asbestos Training & Abatement
- CTDEP, NJDEP, and OSHA Required Training, Programs & Record Keeping

## Project Highlights:

- Currently Providing EH&S Services for 2 Facilities
